

NÉEVO DHA™ capsule Rx

Description

NeevoDHA™ is an opaque blue gelatin capsule. The product contains:

Each Blue gelatin capsule contains:

Dietary Ingredients:

6(S)-5-Methyltetrahydrofolic acid (as L-methylfolate; Metafolin®)	1.13mg*
Calcium (tricalcium phosphate).....	75mg
Elemental Iron (ferrous fumarate)	27mg
Vitamin C (ascorbic acid).....	40mg
Vitamin E (D-alpha-tocopherol)	30IU
Vitamin B6 (pyridoxine as pyridoxine HCl)	25mg
Vitamin B9 (folic acid).....	400mcg
Vitamin B12 (methylcobalamin).....	1mg
Docosahexaenoic Acid (DHA)	250mg**

*1.13mg L-Methylfolate (calculated as L-methyltetrahydrofolic acid) is the molar equivalent of 1.0mg folic acid.

**Docosahexaenoic acid (DHA) from an algal source.

Inactive Ingredients:

Gelatin, tricalcium phosphate, glycerine, beeswax, soy lecithin, soybean oil, titanium dioxide, ethyl vanillin, FD&C blue #1, FD&C red #40, white ink (ammonium hydroxide, isopropyl alcohol, N-butyl alcohol, propylene glycol, shellac glaze in SD-45, simethicone, titanium dioxide).

Indications

NeevoDHA™ is a multivitamin/multimineral nutritional supplement for women who require increased vitamin, mineral and essential fatty acid concentrations throughout pregnancy and the postnatal period for both lactating and non-lactating mothers. It can be used prior to conception to improve nutritional status.

Contraindications

Known hypersensitivity to any of the components in this product is a contraindication.

Warnings

Ingestion of more than 3 grams per day of omega-3 fatty acids has been shown to have potential antithrombotic effects, including bleeding time and INR. Administration of omega-3 fatty acids should be avoided in patients on anticoagulants and in those known to have an inherited or acquired bleeding diathesis.

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control center immediately.

Precautions

Folates, when administered as a single agent in doses above 0.1mg daily, may obscure pernicious anemia in that hematologic remission can occur while neurological manifestations remain progressive.

Adverse Reactions

While allergic sensitization has been reported following both oral and parenteral administration of folic acid, allergic sensitization has not been reported with the use of Metafolin®.

Patient Information

NeevoDHA™ is certified kosher by Triangle K and Associates. 

NeevoDHA™ is gluten-free, lactose-free and yeast-free.

Dosage and Administration

Usual adult dose is 1(one) gelatin capsule daily or as directed by your physician.

How Supplied
